This opinion contains indications relating to the following items: 1. Box No. I Basis of the opinion ☑ Box No. II **Priority** Non-establishment of opinion with regard to novelty, inventive step and industrial applicability Box No. III ☐ Box No. IV Lack of unity of invention Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement ☑ Box No. VI Certain documents cited ☐ Box No. VII Certain defects in the international application ☐ Box No. VIII Certain observations on the international application 2. **FURTHER ACTION** If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered. If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three

months from the date of malling of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/GB2005/000746

	Box	No. I	Basis of the opinion			
1.	With the I	Vith regard to the language , this opinion has been established on the basis of the international application in he language in which it was filed, unless otherwise indicated under this item.				
		langua	pinion has been established on the basis of a translation from the original language into the following age , which is the language of a translation furnished for the purposes of international search Rules 12.3 and 23.1(b)).			
2.	With nece	Vith regard to any nucleotide and/or amino acid sequence disclosed in the international application and ecessary to the claimed invention, this opinion has been established on the basis of:				
	a. ty	pe of r	material:			
] as	requence listing			
] tab	ele(s) related to the sequence listing			
	b. fo	rmat c	f material:			
] in	written format			
	Ε] in (computer readable form			
	c. tir	ne of f	iling/furnishing:			
		o co	ntained in the international application as filed.			
	E	☐ file	d together with the international application in computer readable form.			
] fur	nished subsequently to this Authority for the purposes of search.			
3.		has be	lition, in the case that more than one version or copy of a sequence listing and/or table relating thereto een filed or furnished, the required statements that the information in the subsequent or additional is is identical to that in the application as filed or does not go beyond the application as filed, as priate, were furnished.			
4.	Add	itional	comments:			
_	Box	No. II	Priority			
1.		does requir	alidity of the priority claim has not been considered because the International Searching Authority not have in its possession a copy of the earlier application whose priority has been claimed or, where ed, a translation of that earlier application. This opinion has nevertheless been established on the option that the relevant date (Rules 43bis.1 and 64.1) is the claimed priority date.			
2.		has be	pinion has been established as if no priority had been claimed due to the fact that the priority claim een found invalid (Rules 43 <i>bis</i> .1 and 64.1). Thus for the purposes of this opinion, the international date indicated above is considered to be the relevant date.			

3. Additional observations, if necessary:

Pay No. III. Non-ostablishment of aninian with regard to a series and in the series of					
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:					
	the entire international application,				
\boxtimes	l claims Nos. 17-20				
because:					
	the said international application, or the said claims Nos. (with respect to industrial applicability) relate to the following subject matter which does not require an international preliminary examination (specify):				
	see separate sheet				
	the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):				
	the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.				
	no international search report has been established for the whole application or for said claims Nos.				
	the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:				
	the written form		has not been furnished		
			does not comply with the standard		
	the computer readable form		has not been furnished		
			does not comply with the standard		
	the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.				
	See separate sheet for further details

Re Item III

Claims 17-20 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(l) PCT).

Re Item V

- 1) The subject-matter of present claims 1-23 is new (Article 33(2) PCT).
- 2) The subject-matter of claims 1-23 involves an inventive step (Article 33(3) PCT).

The closest prior art is represented by D1 reviewing different classes of HIV-1 integrase inhibitors.

The subject-matter of present claim 1 differs considerably from the inhibitors disclosed in D1.

The technical problem underlying the present application is seen in the provision of alternative HIV-1 integrase inhibitors.

In view of the disclosure on the page 37, the problem appears to be solved.

There are not hints in the prior art to the presently claimed compounds.

Consequently, the claims 1-15 involve an inventive step.

The claims relating to pharmaceutical compositions and the claims relating to the use of the compounds according to claim 1 (claims 16-23) therefore also involve inventive
